Professional Summary

IT Engineer specializing in Data Science, Artificial Intelligence, and Web Development with experience developing data-driven solutions, AI applications, and modern web systems. Experienced in building scalable solutions using machine learning, automation, full-stack development, and modern software engineering practices. Passionate about solving complex problems through intelligent systems and technology.

Professional Experience

IT Engineer - Data Science & AI

Welbond Armatures | 2021 - Present

- Developing AI and data science applications using Python, machine learning, and data engineering principles
- Building data pipelines, retrieval systems, and automated workflows for data processing and analysis
- Applying statistical methods, data visualization, and predictive modelling to solve business problems
- Delivering end-to-end technical solutions integrating data processing, analytics, and AI technologies
- Developing and supporting web-based solutions to improve workflows, automation, and system accessibility
- Supporting technical infrastructure and implementing scalable software solutions across multiple domains

Education

Bachelor's degree in Information Technology Engineering

Tishreen University

Technical Skills

Programming Languages: Python, JavaScript, Java, C++

Web Development: HTML, CSS, JavaScript, Next.js, React, Responsive Design, REST APIs

Data Science: Data Analysis, Data Processing, Statistical Analysis, Machine Learning

AI & LLM Technologies: Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Conversational AI

Tools & Technologies: LangChain, Vector Databases, ChromaDB, Gradio, Git, REST APIs

Projects

ReactFood - Restaurant Web Application

- Developed a responsive restaurant web application allowing users to browse menus and interact with food ordering workflows
- Built using React and modern front-end technologies with a focus on usability and responsive design

IT Instructors - Educational Platform

- Developed a web platform connecting aspiring IT professionals with experienced instructors using Vue.js
- Designed interactive workflows supporting knowledge sharing and responsive layouts

Languages

English: Fluent

Arabic: Fluent
